**16TH ANNUAL MELVIN D.
SCHLOSS LECTURER**

Karen B. Zur, MD

Dr Karen Zur is a pediatric otolaryngologist practicing at the Children's Hospital of Philadelphia, and leader in pediatric voice and airway. She founded the voice program at Cincinnati Children's Hospital before relocating to the Children's Hospital of Philadelphia where she serves as the Director of the Pediatric Voice Program and Associate Director of the Center for Pediatric Airway Disorders.

She has been an invited speaker to regional, national, and international meetings and is the Vice President of the American Broncho-Esophagological Association. Her publications and presentations on the use of IV Avastin (bevacizumab) for management of recurrent respiratory papillomatosis and her work on recurrent laryngeal nerve reinnervation has changed the lives of patients at CHOP, across the US, and internationally. In addition to scientific publications, authorship in textbooks, and her Triological Thesis on recurrent laryngeal nerve reinnervation, Dr Karen Zur has also co-authored the book Acid Reflux in Children, which empowers parents to treat their children's respiratory reflux and improve their wellbeing with dietary and lifestyle modifications.

**9TH ANNUAL MCGILL
OTOLARYNGOLOGY SCIENCES
LABORATORY LECTURER**

Christopher J. Hartnick, MD, M.S.

With more than 15 years of experience in pediatric otolaryngology, Dr Christopher Hartnick is a Professor of Otolaryngology at the Mass. Eye and Ear and serves as the Director of the Pediatric Otolaryngology Division and the Director of the Pediatric Airway, Voice, and Swallowing Center at Mass. Eye and Ear.

Dr Hartnick has been an invited speaker at regional, national, and international meetings and has published textbooks and more than 150 peer-reviewed papers in the field. He serves as the Physician Director on the Mass. Eye and Ear Board of Directors and is the Vice Chair of Clinical Trials and Outcomes for the Department of Otolaryngology. He is an editor for ENT Journal, a reviewer for Journal of Voice, and an ad-hoc reviewer for several other publications.

Dr Hartnick's clinical interests include pediatric airway and pediatric voice. His primary research interests include the development of maturation of the pediatric vocal fold, pediatric voice disturbances, and pediatric outcomes studies, and he is leading a multi-institutional study on hypoglossal nerve stimulation in children for obstructive sleep apnea.

PROGRAM OVERVIEW

This conference is intended for practicing Pediatric Otolaryngologists, General Otolaryngologists, residents, Speech-Language-Pathologists, and any professional treating children with voice problems. It covers topics from the basics of pediatric voice assessment, to the common presenting problem of pediatric cough, to current

and cutting-edge therapies for vocal fold paralysis and recurrent respiratory papillomatosis, and finally to emerging technological developments in pediatric laryngology. You will find a distinguished international faculty that will provide a review of contemporary diagnosis and management techniques to enhance your practice.

GENERAL INFORMATION

Disclosures

Faculty members are expected to disclose to participants any discussion of off-label and/or investigational use of pharmaceutical products or devices within their presentations.
